

Request from the Government of Japan

As the number of COVID-19 cases is rising, please take every measure to prevent the spread of infections.

- Avoid attending events and dinner meetings in the Three-Cs* or when basic infection prevention measures are not taken (in particular, events and parties involving crowds of people speaking loudly).
- When attending events or dinner meetings, be sure to practice proper infection prevention measures, such as maintaining a proper distance between each other, sanitizing your hands, wearing face masks, and refraining from speaking loudly.
- Avoid heavy drinking on the streets or at restaurants, drinking until late at night, and attending events where alcoholic drinks are served.
- Try to find new ways to enjoy your life, such as spending more time with your family at home and participating in online events.

* Closed spaces, crowded places, close-contact settings
